

- Pupil Questionnaires
- Context and response

# Context

- The questionnaires were released in the summer of 2019 and were completed online.
- In school the children completed it electronically in the computing suite as a class so that all children could take part.

# Do you enjoy being at school?

I enjoy being at school

260 responses

Response: A strong response and most teachers explained, during completion, that school wasn't optional – as some pupils said they would rather be playing video games than go to school. I'd still like a larger amount wanting to come to school. See rewards and praise later.

# I feel safe in school

260 responses

Response: Very strong response – safeguarding and safety a constant top level consideration. The new reception area and the electronic signing in have helped reinforce this area. Constant review of safeguarding continues.

My well-being: If I am upset or sad I know there are ways to help me e.g. SEAL box, Peer Mentoring, talk to a teacher.

260 responses

Response: The SEAL box has been renamed the class 'Mood Box' and a stronger focus put on wellbeing including a wellbeing week at the start of the new academic year.

I know how to use the Internet safely and about E-Safety and will report any concerns I have around keeping safe.

260 responses

Response: High levels of cyber-safety. PSHE and computing lessons reinforce this. Some children still have access to age-inappropriate platforms on tablets and phones that can bring children into conflict outside of school.

# There are lots of clubs at school to choose from.

260 responses

Response: Strong response. We have around 27 clubs and extra curricular activities, 11 of those are sport. No primary school locally has as many clubs as our school. A very broad and balanced curriculum available to all. We were the 3<sup>rd</sup> highest participants in the Surrey for the District Sports.

# I have attended a school club this year.

260 responses

Response: A healthy and positive result. Club assemblies are held at the start of the term to encourage and enthuse children to join a club, including demonstrations, participation and videos. Some individual children do not do any clubs and this pattern goes through their time with us. Ultimately parental choice.

# I know about the School Council and feel that it tries hard to represent the children's views

260 responses

Response: School Council are elected and meet around once a month with me. Training and guidance states that three key ideas maximum should be discussed but it usually ends up being all ideas being considered. School Council take their role seriously, they discuss and feedback to their class. Their achievements over the last three years are on display in the hall.

# My teacher tries to make my lessons interesting and fun

260 responses

Response: Very positive result. Additional comments at the end confirm this viewpoint. Teachers do work hard to ensure lessons are engaging and involve progress in learning. Children commented that their teachers are kind, friendly and funny.

# The school encourages me towards a healthy life style e.g. healthy meals, sporting clubs and exercise in PE and Games

260 responses

Response: Very strong result. More input needed on unhealthy packed lunches sneaking into school. Mr Johnson makes a huge effort to address the needs and wants of the children. He is flexible and has added a range of items including a fresh salad bar and pasta optional foods.

# I feel I am getting better at my work and making progress

260 responses

Response: A huge majority of children happy with their progress. Teachers continue to track and review the pupil progress all the time.

My teachers give me lots of praise e.g. Star of the Week, Dojo's, BELIEVE awards, Head Teacher awards, Times Table certificates.

260 responses

Response: A good response though a stronger focus on rewards, certificates and praise has been tabled. Higher rewards for more prestigious achievements also being implemented.

# I am encouraged and rewarded for reading regularly at home

260 responses

Response: a good response illustrating high levels of support. The issue for the school is to encourage and supplement those who are not being supported – with a focus this year on reading.

# Homework is linked to what I am learning in school

260 responses

Response: Great result. Teachers explain all homework when delivered. Homework review happening at the moment. A move to more investment in online platforms and a move away from paper though some remains.

# What do you like the most about school?

- The teachers are all amazing
- The teachers make the lessons very fun
- It's very clean and tidy
- Mr Hurd's jokes
- I like the lessons
- The residential trips
- The school trips
